

PHP and SAP in twenty five minutes or less

Nigel James

AppsCom Limited

appscom.co.uk

What is SAP?

- Enterprise Software
- BIG
- Expensive
- Runs 'the world'

Key technical features

- Abstraction from Hardware and Database

Trial Install from SDN

- **Need gobs of memory**
This image is from shutting SAP down. Memory dropped from 2.2Gb to 1.2 and SAP had only been started and not used.
- **At least 2GB**
- **See sdn.sap.com**
(SAP Developers Network)
